Evidence of Performance
Lever handles and knob furniture as per EN 1906:2012

ift ROSENHEIM

Test Report
No. 24-002856-PR01
(PB-023-03-en-01)

Client: ZOGOMETAL SA, 4th km Koropi - Vari Avenue, 194 00 Koropi, Attica, Greece

Product: Lever handle set
Designation: Code 2331
Performance-relevant product details: Material handle: Brass; Storage: Rotatable - fixed; Spindle: 8 mm; Material of spindle: Steel
Installation: According to installation instruction from hardware manufacturer
Special features: -/-

Basis: EN 1906:2012
Testing standards: EN 1906:2012
Corresponds to the national standards (e.g. DIN EN)

Representation

Results
Classification according to EN 1906:2012

Category of use	Durability	Door mass	Fire resistance	Safety	Corrosion resistance	Burglary protection	Type, type design
4	7	-/-	0	0	4	0	B

Instructions for use
This test report serves to demonstrate the requirements of lever handles and knob furniture as per EN 1906:2012

Validity
The data and results given refer solely to the tested and inspected specimen. Classification remains valid as long as the product and its unique basic remain unchanged. The result can be extrapolated to other products if the specifications given in the product standard under the manufacturer's responsibility are met. The test report does not allow any statement to be made on further characteristics of the present structure regarding other requirements, in particular the effects of weathering and ageing.

Notes on publication
The IFI-Guidance Sheet "Advertising with IFI test documents" applies. The cover sheet can be used as an attached.
The report contains a total of 15 pages.

Test Report
No. 18-001908-PR01
(PB-019-01-en-01)

Client: ZOGOMETAL SA, 4th km Koropi - Vari Avenue, 194 00 Koropi, Attica (Greece)

Product: Non-edge mounted items of building hardware
Designation: "47-B/0908"
Dimensions of specimen (W x H): 500 mm x 500 mm
Clear opening: mounted without frame
Material: wooden door
Lined: none
Type of opening: hinged doorset
Special features: none
Exposed face: symmetrical
Supporting construction: Standard supporting structure as solid structure with high density and a thickness of 175 mm

Basis
EN 1363-1:2012
EN 1363-2:2012
EN 1634-2:2000
EN 1634:2014
EN 13501-2:2016
Equivalent to the national DIN EN standards.

Representation

Fire resistance

Criteria	Test results
Integrity	43 minutes
Insulation	43 minutes
Termination of the test	in the 44 minute

Instructions for use
This test report serves to demonstrate the fire resistance of door and shutter assemblies. The test results do not provide any verification of applicability as set out by the relevant standards.

Validity
The data and results given refer solely to the tested and inspected specimen. Testing for other specimens and/or make any statement to be made on any further characteristics required by the construction of the construction submitted.

Notes on publication
The IFI Guidance Sheet "Conditions and Guidance for Use of IFI Test Documents" applies.
The cover sheet can be used as an attached.
