Evidence of Performance
Lever handles and knob furniture as per EN 1906:2012

Test Report
No. 24-002956-PR01
(PB-0303-03-en-01)

ift ROSENHEIM

Client: ZOGOMETAL SA, 4th km Koropi - Vari Avenue, 194 00 Koropi, Attica, Greece

Product: Lever handle set
Designation: Code 2201
Performance-relevant product details: Material handle: Brass; Storage: Rotatable - fixed; Spindle: 8 mm; Material of spindle: Steel
Installation: According to installation instruction from hardware manufacturer
Special features: -

Basis: EN 1906:2012
Testing standards: EN 1906:2012
Correspondes to the national standards (e.g. DIN EN):
Representation:
Instructions for use:
This test report serves to demonstrate the requirements for lever handles and knob furniture as per EN 1906:2012

Validity:
The data and results given refer solely to the tested/described specimen. Classification remains valid as long as the properties of the product have not been changed. The result can be extrapolated to other sizes within the specifications given in the product standard under the manufacturer's responsibility. The present test report does not allow any statement to be made on further characteristics of the present structure regarding durability, in particular the effects of weathering and ageing.

Notes on publication:
The ift-Guidance Sheet "Advertising with ift test documents" applies. The cover sheet may be used as an abstract.
The report contains a total of 15 pages.

Results:
Classification according to EN 1906:2012

Category of use	Durability	Door mass	Fire resistance	Safety	Corrosion resistance	Burglary protection	Type, type design
4	7	-/-	0	0	4	0	B

EN 1906:2012

ZOGOMETAL follows **EN 1906:2012:** Building Hardware - Door Handles and Knobs - Requirements and test methods for the evaluation of its products.

Evidence of Performance
Fire resistance characterisation test for elements of building hardware

Test Report
No. 18-001908-PR01
(PB-G19-01-en-01)

ift ROSENHEIM

Client: ZOGOMETAL SA, 4th km Koropi - Vari Avenue, 194 00 Koropi, Attica, (Greece)

Product: Non-edge mounted items of building hardware
Designation: "47-B02BB"
Overall dimensions of assembly (W x H): 500 mm x 500 mm
Clear opening width: mounted without frame
Material: wooden door
Lined: none
Type of opening: hinged doorset
Special features: none
Exposed face: symmetrical
Supporting construction: Standard supporting structure as solid structure with high density and a thickness of 175 mm

Basis: EN 1363-1:2012, EN 1634-1:2008, EN 1634-2:2009, EN 16034:2014, EN 13501-2:2016
Equivalent to the national DIN EN standard/s:
Representation:
Instructions for use:
This test report serves to demonstrate the fire resistance of door and shutter assemblies. Testing for the purpose of site visits any verification of applica- bility as set out by the relevant standards.
Validity:
The data and results given refer solely to the tested and described specimen. Testing for the purpose of site visits any statement to be made on any further characteristics re- garding durability, in particular of the construction submitted.
Notes on publication:
The ift Guidance Sheet "Conditions and Guidance for the Use of ift Test Documents" applies.
The cover sheet can be used as an abstract.
Contents:
The report comprises a total of 30 pages (incl. Annexes).
1 Task
2 Procedure
3 Results
Annex (29 pages)

Fire resistance

Criteria	Test results
Integrity	43 minutes
Insulation	43 minutes
Termination of the test	in the 44 minute
